

# Chances of a Disability

What is the chance of having at least one long-term disability which lasts for three months or longer before reaching age 65?

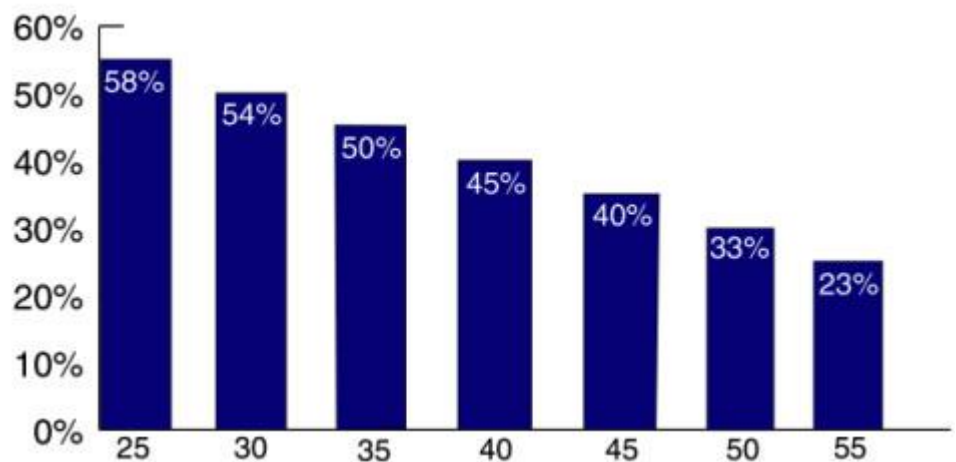

Age	Probability
25	44%
35	41%
45	36%
55	27%

If the disability has lasted one year, what is the probability the disability will last:

	Age			
	25	35	45	55
<b>1 More Year</b>	67%	76%	79%	81%
<b>2 More Years</b>	57%	67%	72%	73%
<b>5 More Years</b>	47%	57%	62%	62%

What is the chance of being disabled for life if the disability has lasted at least three months?
